GOVERNOR OF TENNESSEE SETS NEW MARK IN EXTENDING CLEMENCY.

Act of Freeing Col. Cooper Draws At tention of Opponents of Governor Patterson to Unusual Record of Chief Executive

Nashville, Tennessee. - The opponents of Gov. Malcolm R. Patterson who are severely criticising his action in pardoning Col. D. B. Cooper, convicted of the murder of former Senator E. W. Carmack, have turned their attention to the records in the office of the secretary of state. These show that in his three years and two months in office, Patterson has issued pardons to 956 men convicted of felonies and misdemeanors.

He has pardoned 152 persons convicted of murder, 103 illicit liquor sellers, 175 men convicted of carrying concealed weapons, 124 convicted of larceny and 402 sentenced for other misdemeanors.

In this state illicit liquor selling and the carrying of concealed weapons are only misdemeaners. Sometimes the accused is fined and given a workhouse sentence; at others only a fine is imposed.

Wholesale Appeals Made.

There are 1,600 convicts confined in prison in the state and there is hardly one who has not appealed for clemency. The governor's friends have Economists who declare there is pointed out that many of the pardons now too much gold will not exert any granted were issued by him after peof the man with a mining prospectus. the community in which the crimes were committed. ## **NEW THEORY IS** RAPIDLY SPREADING **OVER COUNTRY**

L. T. Cooper's theory concerning the human stomach, which he claims to prove, with his new medicine, is being given more respect and comment every day.

Cooper claims that 90 per cent of all ill health is due to stomach trouble. When interviewed about his theory recently, he said: "Stomach trouble is the great curse of the 20th century so far as the civilized races are concerned. Practically all of the chronic ill health of this generation is caused by abnormal stomachle conditions. In earlier days, when the human race was closer to nature, and men and women worked all day out of doors, digging their frugal existence from the soil, the tired, droopy, half-sick people that

are now so common, did not exist. "To be sure, there was sickness in those days, but it was of a virulent character, and only temporary. There was none of this half-sick condition all the time with which so many are afflicted nowadays.

"I know positively that every bit of this chronic ill health is caused by stomach trouble. The human stomach in civilized people today is degenerate. It lacks tone and strength. This weakness has gradually come through a sedentary existence. I further know that few people can be sick with the digestive apparatus in perfect shape. sole reason for my success is because my New Discovery medicine tones the stomach up to required strength in about six weeks' time. That is why l have had more people come and thank me wherever I have gone to introduce my medicine, than I have had time to

talk with." Among the immense numbers of peo ple who are now strong believers in Cooper's theory and medicine is Mrs. M. E. Delano, a prominent resident of the suburb of Brookline, Boston, Mass. She says: "For several years I was broken in health, caused primarily by stomach and nerve troubles. I gradually became worse, until recently I was compelled to go without solid food for days at a time. I had sour stomach, palpitation of the nerves of stomach and heart, dyspepsia, and extreme nervousness. I suffered terribly with insomnia, and my liver, bowels and whole system gradually became deranged. I felt instant relief the first day I began this Cooper medicine. I now feel like a new being. Today I walked all over town, shopping-some

thing I have not done for years. "I make this statement wholly from a sense of duty. I feel I owe it to anyone who might find relief and renewed happiness as I have done."

> MISCHIEF MAKER A Surprise in Brooklyn

An adult's food that can save a baby proves itself to be nourishing and easily digested and good for big and little folks. A Brooklyn man says: When baby was about eleven months old he began to grow thin and pale. This was, at first, attributed to the heat and the fact that his teeth were coming, but, in reality, the poor little thing was starving, his mother's milk not being sufficient nourishment.

"One day after he had cried bitterly for an hour, I suggested that my wife try him on Grape-Nuts. She soaked two teaspoonfuls in a saucer with a little sugar and warm milk. This baby ate so ravenously that she fixed a second which he likewise finished.

"It was not many days before he for got all about being nursed, and has since lived almost exclusively on Grape-Nuts. Today the boy is strong and robust, and as cute a mischiefmaker as a thirteen months old baby is expected to be.

"We have put before him other foods, but he will have none of them, evidently preferring to stick to that which did him so much good-his old friend Grape-Nuts.

"Use this letter any way you wish, for my wife and I can never praise Grape-Nuts enough after the brightness it has brought to our household."
